Never skip genetics day, no gym for your face bros

I didn't skip it, the day skipped me

magical genetics that come out of nowhere. Dutch people
just so happen to be tall and good looking for no reason at all
👍 must be those magical genetics

What if I use gene therapy lol

"I AM ADONIS! I AM ADONIS! I AM ADONIS!."

I mutter this everyday before going to sleep and after waking
up. I've now had a flock of stacies chasing me

You have to repeat that at 3 AM while looking at the mirror
and with the lights off and at the next day: Wala! You will
become Gigachad and an army of Stacies will flock to you!

So eazy!

Holy buddy boyo

receding hailine = its over anyway, gym wont help

The worst is when your crown is also receding, hair is
trapped in a pincer movement.

it will only accelerate the process.

But broo what about the hair exercises? Your hair should lift
100kg barbells at minimum Though I am more blackpilled
than most, it's pretty funny that in a video about how what
matters is bone structure, people also have the conflicting
thought that losing your hair means it's over. If you are tall,
have a nice skull shape, being bald doesn't matter.

Username am hitlers top guy

they laughed

at him when he went bald people who comment on videos with hashtags as tcc and other things as if they are prvtty themselves but that doesnt matter

Only if you can play it off as "by choice". Genetic potential is still the biggest selling point, as desire is based off of what potential offspring will look like. If you have a genetic factor that trumps other disadvantages to an extreme (like being 6'6"+), they might overlook baldness or poor bone structure. Username offendingtheoffended or offendingtheoffendable "If you are a Chad, you can afford to loose your hair."

Even if its obvious it still should be said

Most people have internal consistency of genetics

"B-But rehab, I don't see it that way"

Brotha... THE EVIDENCE sees it that way
